

# APPENDIX “A”

## Changes in LTC: Fairmount

**ABS:** (*Aggressive behavior Score: measures aggression in residents by calculation of aggressive behaviours*)

- ❖ Only 29.5% of the residents admitted 5 years ago exhibited any aggressive behaviours vs. 79.1% of those being admitted now. That's 50% increase of residents who present with aggressive behaviours vs 5 years ago.

**ADL:** (*Activities of Daily Living Score: measures what the resident can do for themselves*)

- ❖ 13.2% of the residents admitted five years ago were mostly independent vs. only 0.8% being admitted now.

**Note:** 65% of the residents being admitted into long term care require 2 staff members present to complete care safely vs. 25% 5 years ago.
